

## Corporate Disclosure Statement. \$TXTM

### **ENGINEERING THE INFRASTRUCTURE LAYER BETWEEN BIOLOGY, PHARMACEUTICAL SCIENCE & DIGITAL CAPITAL**

**Protext Mobility Inc.** is a biotechnology, pharmaceutical infrastructure, and digital systems company focused on engineering next-generation biological, pharmaceutical, and digital infrastructure systems through advanced biotechnology, proprietary live plant extraction science, active pharmaceutical ingredients (“API’s”) development, institutional technology platforms, and emerging digital infrastructure solutions.

The Company is positioned at the convergence of biology, pharmaceutical science, and digital finance, with strategic initiatives focused on the development of scalable infrastructure systems designed to support future healthcare, scientific, agricultural, and digital economy applications.

Protext Mobility Inc. operates as a subsidiary of RAMMD Acquisitions LLC – the holding company. The broader ecosystem was developed through years of advancement across biotechnology research, agricultural infrastructure, pharmaceutical science, molecular preservation technologies, institutional financial positioning, and international strategic relationships.

#### **The Company’s strategic initiatives include:**

- Advanced API infrastructure
- Proprietary live plant extraction technology
- Nanotechnology-enhanced formulations
- Real-world asset (“RWA”) infrastructure
- Institutional financial frameworks
- Global digital liquidity systems
- Biotechnology infrastructure systems

- Pharmaceutical formulation and processing platforms
- Agricultural production infrastructure
- Digital interoperability frameworks
- Tokenization technologies and digital asset systems

**The broader ecosystem has been strategically developed through initiatives spanning:**

- Botanical and pharmaceutical research
- Cultivation and agricultural infrastructure
- Molecular preservation technologies
- Clinical and wellness initiatives
- Sustainable biological systems
- Institutional financial positioning
- International strategic relationships

Protext Mobility's long-term objective is to help bridge biological production systems with next-generation pharmaceutical and digital financial infrastructure by developing scalable pathways between real-world biological assets and global capital markets.

The Company remains committed to scientific advancement, intellectual property development, sustainable innovation, strategic partnerships, and infrastructure deployment designed to support long-term shareholder value and continued technological development across biotechnology, pharmaceutical infrastructure, and digital systems markets.

**Engineering the Future of Biological Pharmaceutical & Digital Infrastructure**
